# LONG-LIVED ASSET IMPAIRMENT

Disruption from COVID-19 may have lasting changes on the demand for certain products

Visit our website for more information on how we can help. [www.fidatopartners.com](http://www.fidatopartners.com)

Carpet Industry

We believe businesses must do more to foster sustainable and inclusive growth which supports the attainment of United Nations Sustainable Development Goals (UNSDGs). The stepping stone towards devising a long term sustainability strategy for an organization is to assess their current impact on Society, Economy and Environment, the three pillars of sustainability. We at Agile help our clients in developing sustainability reports, implementing sustainability initiatives and setting short and long term sustainability strategy. Our robust methodology ensures that the reports and strategies we develop integrate the global and regional sustainability frameworks such as UN SDGs, UNGC principles, GRI Standards, SBTi, CDP etc. Till date we have delivered 20+ sustainability reporting and strategy assignments for several clients across Middle East and Asia, positioning us as one of the leading sustainability report consultant in the Middle East and Asia Region. ESG Services - Click to know more

Reporting on ESG performance has increasingly become important for organisations globally. Our robust methodology ensures that the sustainability report we develop integrate the global and regional sustainability frameworks such as UN SDGs, UNGC principles, GRI Standards, GHG Protocol etc. As a sustainability report consultant we have worked on 20+ reports for clients across industry sectors. Our sustainability strategy approach guides companies through ESG challenges by starting where you are along your sustainability journey and helping you to develop a comprehensive sustainability strategy that supports your company's business objectives. As a sustainability consultant we have developed sustainability strategy for both government and private sector organisations. We conduct review of the report and audit the non-financial data to provide our assurance opinion for a sustainability report. We have pool of resources having expertise in different sustainability issues including, energy, water, waste, human resource etc. We have provided sustainability assurance to several clients. Know more about our Assurance Services

ISO 26000 is viewed as a way of assessing and implementing organization's commitment to sustainability and overall performance. We have supported several organisations in implementing CSR management system in line with ISO 26000 requirements, Business Responsibility Reporting ("BRR") and the upcoming business responsibility and sustainability reporting ("brsr") are mandated sustainability disclosures expected from the stock exchange registered companies. The requirements were issued by SEBI, India. We help our clients identify, monitor and report on the KPIs in line with the BRR / BRSR requirements. Click here to know more about our BRR services

Supply chain management is an indispensable part of a business's sustainability program. Knowing the level of environmental, social, and economic impact the supply chain has is becoming increasingly common as all industries move towards a more sustainable future. We at Agile assist organisations in identifying, managing, and setting goals and targets against the supply chain risks and opportunities. "Everything depends on our ability to sustainably inhabit this earth, and true sustainability will require us all to change our way of thinking on how we take from the earth and how we give back." Stakeholders are becoming aware and expecting transparency on social and environmental impacts

Enhance market Share and differentiate brand Access to funds earmarked for sustainable/ESG investments & green bonds Regulatory requirements Peer pressure Right thing to do "Nowadays corporates are more and more under the spotlight for the impact they have on the communities and the environment. We are witnessing a growing demand for enhanced transparency on non-financial (Sustainability/ESG) reporting coming from civil society, regulatory bodies, socially responsible investors, international organizations and also from national and international regulatory requirements. In other words, there's a strong demand from stakeholders for a transparent disclosure of information concerning the Sustainability/ESG issues. As one of the leading sustainability reporting consultant we help companies identify material ESG topics they must disclose in line with global best practices and standards. In our role as a sustainability report consultant we make sure that the client receives a world class report that comes with global best practices on sustainability reporting

The E in ESG stands for environmental criteria. These include energy consumed, GHG emissions, waste generation, water and other natural resource consumption as well as release of pollutants

S denotes the Social Criteria and includes issues such as community welfare programs, labor relations, diversity and inclusion, human rights, consumer protection etcG, represents the Governance of the organisation and includes practices, controls, and procedures a company adopts in order to govern itself, make effective decisions, comply with the regulations, operate fairly and meet the needs of its stakeholders. As your sustainability report consultant we ensure that we support you from the kick off till the launch of the report. We handhold our clients throughout the reporting cycle.
